Attach to APEX700
 Focus the power of your Portacool

Cut Through the Heat.

The Portacool VORTEX™ delivers targeted cooling right where it matters most.

An add-on for the Portacool APEX 700™ evaporative cooler, the VORTEX™ Precision Cooling Kit transforms any trailer, dock, or confined space into a cooler, safer, more productive environment in minutes. VORTEX delivers targeted cooling relief for:

What makes VORTEX™ different?

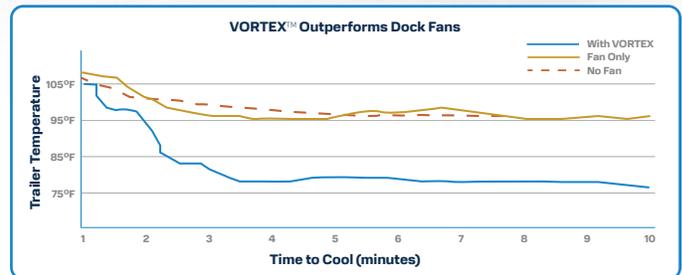

VORTEX is the only cooling solution on the market that rapidly delivers evaporative cooling deep inside enclosed trailers and other confined spaces.

Innovative Design. Durable, high-velocity nozzle with 180° pivot mount and integrated LED light is designed for trailers and dock environments.

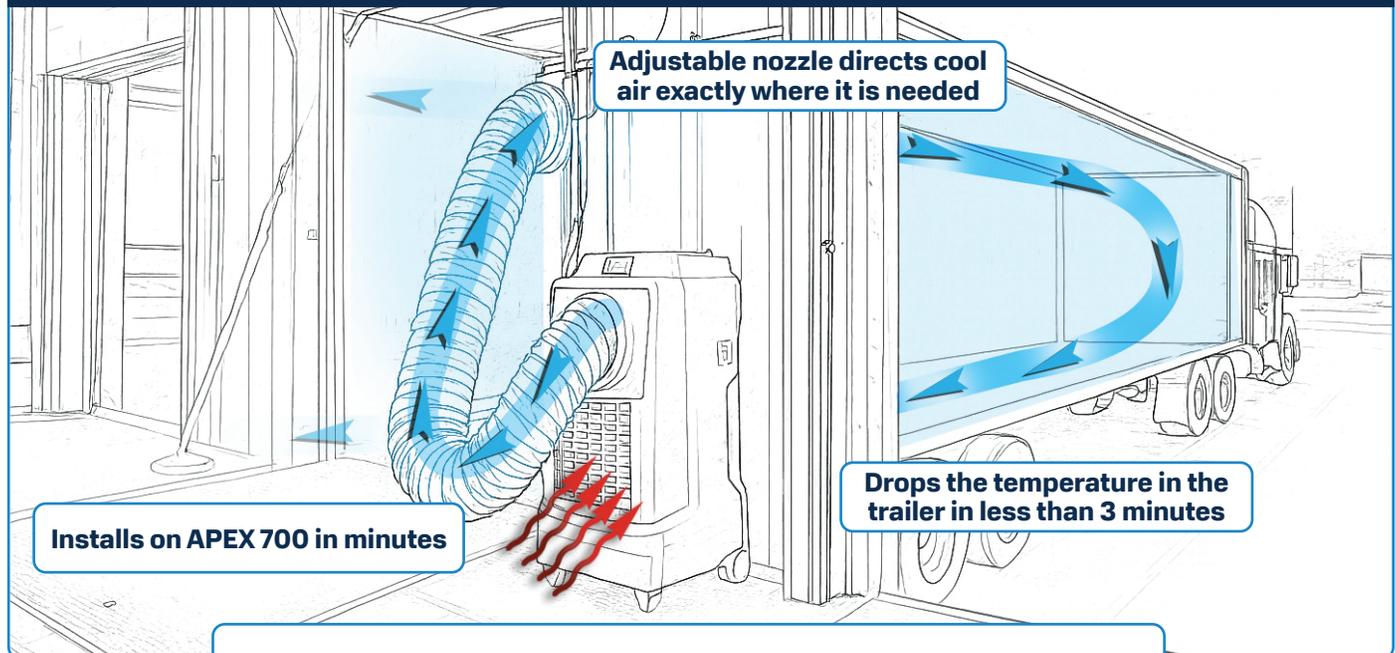

Leading Performance. Exchanges the hot air in a full-size 53' trailer for cool air in under 3 minutes.

Portable & Easy to Install. The quick-mount system bolts on to the APEX 700 and can be installed, removed, or repositioned in minutes.

Ready to Work. Made of rugged, durable materials and built for industrial use, the VORTEX comes with a 1-year warranty on all parts and the peace of mind that comes with the Portacool™ name.
